

Binary Bloom - In Marine Grade Stainless

MODEL SS-050 / STAINLESS STEEL

A blooming stainless steel sculpture combines the vibrant beauty of flowers with the enduring strength and reflective qualities of stainless steel. This type of sculpture often takes inspiration from the intricate forms and delicate stages of blooming flowers, whether depicted realistically or with an abstract flair. The highly polished surface of the steel captures and reflects the surrounding environment, allowing the sculpture to both blend with its setting and remain a distinctive work of art.
